We gather the pharmacy and the pharmaceutical industry to support newly arrived academics

Pharmacists Without Borders Sweden (FuG) initiated the integration project Farmaceutkompis (Pharmacist Friend) in November 2015. Newly arrived academics in this industry may have difficulties establishing in the Swedish society, both socially and on the job market. FuG, together with several partners, enable newly arrived academics to easily get a contact into Swedish society - a contact that is also matched to the person's needs and are established in pharmaceutical and pharmaceutical industry!

This is how Farmaceutkompis works

Newly arrived and already established who wants to be matched with a friend can easily register on the project's website **www.farmaceutkompis.se**. You will then be matched with a friend who has similar interests. The friend pairs will then decide for themselves how often they will meet and what they will do together, but the requirement is that you should meet at least twice a month for a period of six months. There will be regional contact persons available for all, from whom you can get advice and ask questions. Farmaceutkompis will also arrange joint activities for all registered friends, such as dinners and language cafés. Our partners will also arrange events for all registered friends, such as work place visits at pharmacies.

Do you want to join? Sign up easily on **www.farmaceutkompis.se**! Please also visit and like our Facebook page **www.facebook.com/farmaceutkompis** to receive continuous information about the project and upcoming events.

Do you have any questions? Don't hesitate to contact us on **farmaceutkompis@fug.se**!
